Customer Representative

Twin Falls, Idaho

- Photographer for Parks and Rec youth sports and Santa booth at the local Mall
- Responsible for taking, editing, printing, and packaging photos as well as dealing with customers, kids, parents, and coaches

Skills

Languages: Java, C, R, SQL, HTML/CSS

Soft Skills: Attention to detail, Organization, Multitasking, Problem Solving

Projects

Interpreter: I built an interpreter using Java for a simple custom programming language. This language implemented block scope and was capable of reading user input, simple math and relational operations, if/else statements, while loops, and comments.

Task Tracker: I worked with a group of 3 other students to build a Task Tracker app using Scala. We utilized ScalaFX to make an easy to use GUI. Each created task includes a name and end data and are automatically sorted prioritizing tasks that needed to be done first.

OpenStreetMap Analysis: I wrote a Javascript program that recursively scans a user specified JSON file obtained through OpenStreetMaps's Overpass API. This scan finds, lists, and counts every instance of a user specified tag in the location represented by the JSON file. An example use of this program is to find the top contributors to OpenStreetMap in any area.

Volunteer Work / Achievements

Dean's List

2021 – 2023

Boise State University

Eagle Scout

2019

Boy Scouts of America

High School I.T. Help Desk Team
